	Daniel W. Howell	3722
The MAILING DATE of this communical All claims being allowable, PROSECUTION ON THE M herewith (or previously mailed), a Notice of Allowance (NOTICE OF ALLOWABILITY IS NOT A GRANT OF PA of the Office or upon petition by the applicant. See 37 C	tion appears on the cover sheet with ERITS IS (OR REMAINS) CLOSED in PTOL-85) or other appropriate commun ATENT RIGHTS. This application is su	this application. If not included nication will be mailed in due course. THIS
1. This communication is responsive to <u>12-14-06</u> .		
2. The allowed claim(s) is/are <u>1-14</u> .		
 3. Acknowledgment is made of a claim for foreign a) All b) Some* c) None of the 1. Certified copies of the priority docum 	9 :	r (f).
2. Certified copies of the priority documents have been received in Application No		
3. Copies of the certified copies of the priority documents have been received in this national stage application from the		
International Bureau (PCT Rule 17.2(a)).		
* Certified copies not received:		
Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application. THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.		
4. A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.		
5. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.		
(a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached		
1) 🔲 hereto or 2) 🔲 to Paper No./Mail Date		
(b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date		
Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).		
6. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.		
		·
Attachment(s) 1. ☑ Notice of References Cited (PTO-892)	5. ☐ Notice of Info	ormal Patent Application
2. Notice of Draftperson's Patent Drawing Review (P	rTO-948) 6. ☐ Interview Su	mmary (PTO-413),
2 M Information Displacure Statements (DTO/SD/00)	Paper No./N	Mail Date Amendment/Comment
 Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date 12-5-06 	7. Examiners 7	Amendment/Comment
4. Examiner's Comment Regarding Requirement for of Biological Material	'/	Statement of Reasons for Allowance

Application/Control Number: 10/812,146

Art Unit: 3722

The examiner will provide the definitions used to determine the scopes of the claims. The rear portion of body 32a has toothing 48a (not threads), and the rear portion of body 32a and fixing sleeve 36a has a form locking connection, such that rotation of fixing sleeve 36a relative to the body 32a is not possible (see page 13, lines 2-7). As control ring 16a is rotated in the locking direction, arresting means 12a are pushed down into toothing 48a, such that axial movement between the body and arresting means 12a is not possible due to this "form locking connection 14a" (page 13, lines 14-17). The shape or "form" of the toothing and arresting means cause the locking to happen. With respect to the present claims, a "form locking connection" is defined to be a connection where the shapes of interengaging complementary parts prevent their relative movement.

Clamping sleeve 54a and fixing sleeve 36a (which contains the arresting means 12a) have threads 50a, 52a, which permit them to move axially relative to each other as the clamping sleeve is rotated relative to the body 32a. This axial movement of the clamping sleeve 54a is directed axially against guiding sleeve 42a in order to force the jaws against the shank of the drill bit. This force provided from the clamping sleeve to the guiding sleeve is the "clamping support force" (see page 14, lines 13-15, and page 18, lines 13-16). With respect to the present claims, the "clamping support force" is defined to be the axial force needed to close the jaws on a tool shank.

Putting these definitions together for analyzing claims 1 and 12, it is seen that the arresting means produces a form locking connection, and this connection will serve to receive that clamping support force.

2. The following is an examiner's statement of reasons for allowance: the embodiments of figures 2-3 and 6-7 of German 10109490 are representative of the closest art of record. There is no suggestion to provide the German '490 reference with the form locking connection as set forth in claims 1 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

- 3. Claims 1-14 are allowed.
- 4. Any inquiry concerning the content of this communication from the examiner should be directed to Daniel Howell, whose telephone number is 571-272-4478. The examiner's office hours are typically about 10 am until 6:30 pm, Monday through Friday. The examiner's supervisor, Monica Carter, may be reached at 571-272-4475.

In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office actions directly into the Group at FAX number to 571-273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account. Please identify Examiner Daniel Howell of Art Unit 3722 at the top of your cover sheet.
